1 - Presentation of the EcoCleaner BDO2002

English

It is with great **enthusiasm** that we present the **EcoCleaner BDO2002**, an innovative cleaning product specifically designed for the removal of hydrocarbons and oil. With its exclusive water-based, biodegradable, neutral, non-toxic, and non-explosive formulation, EcoCleaner BDO2002 stands out as a leader in the cleaning industry.

Features and Benefits of the **EcoCleaner BDO2002**:

Water-Based and Biodegradable: The unique formula of **EcoCleaner BDO2002** utilizes the power of water as a base, significantly reducing environmental impact. The product is 100% biodegradable within just 72 hours, as attested by laboratory reports.

Neutral and Non-Toxic: Safety is a top priority. **EcoCleaner BDO2002** is formulated with neutral and non-toxic ingredients, making it safe for marine life and ensuring a safe working environment. Reports confirm non-toxicity, and the absence of organochlorides and heavy metals.

Non-Explosive and Non-Flammable: The composition of **EcoCleaner BDO2002** is engineered to be non-explosive and non-flammable, offering maximum safety during handling and storage, eliminating the risks associated with traditional products.

Exclusive Formula with Essential Oils: **EcoCleaner BDO2002** features an innovative formula using carefully selected essential oils. These oils have a unique action on the rheology of oil, preventing emulsification.

This non-emulsifying characteristic is **UNIQUE** in the market, allowing 100% of the oil to be recovered and reused, as it does not alter its physicochemical properties.

Reduction of Waste and Labor Time: Thanks to its unique formulation, **EcoCleaner BDO2002** results in setotion into 3 distinct phases, leading to up to 70% less waste.

Furthermore, its effectiveness contributes to a 30% reduction in the time and labor required.

Compared to conventional methods (which use ratios from 1:6 to 1:12), **BDO2002** reduces the amount of product wasted by 80%.

Efficient Chemical Vector: **BDO2002** is a chemical vector that acts effectively through contact with the hydrocarbon. Physical processes (blasting, heating, centrifugation, pumping, wiping) significantly accelerate its performance. It can be heated to 120°C without losing its characteristics. In freezing environments, **AN3 Comércio** can add additives to the formulation to prevent the product from freezin
